```
create or replace procedure upprice(hotel_id int,amount int)
LANGUAGE plpgsql
AS $$
begin
  update hotels
  set price = price + amount
  where hotels.id = hotel_id;
end;
$$;
```

The screenshot shows the DBeaver 22.3.3 interface. The main window displays a SQL editor with the following code:

```
create or replace procedure upprice(hotel_id int,amount int)
LANGUAGE plpgsql
AS $$
begin
    update hotels
    set price = price + amount
    where hotels.id = hotel_id;
end;
$$;
```

An "Execution Error" dialog box is open in the foreground, displaying the following message:

Error occurred during SQL query execution

Причина:  
SQL Error [42601]: ERROR: syntax error at or near "procedure"  
Позиция: 19

The dialog box includes three buttons: "Остановить" (Stop), "Повторить" (Repeat), and "Сведения >>" (Details >>).
