The screenshot shows a database client window titled "Rowset: LCPI OLE DB Provider for InterBase [v5] [Prof] [Trial] (E:\DATABASE\IBP_TEST_FB02-...)". The main area displays a query result for the query "select ID from DUAL" and "select (x.*), ((x.*)) from dual x". The result table has three columns: "Row Handle", "ID", and "ID". The first row has a row handle of "0x00000000..." and two "ID" values of "1".

Row Handle	ID	ID
0x00000000...	1	1

On the right side, there is a "Provider Information" panel with the following details:

- Provider: Name: `lcpi.ibprovider-v5_vc17_w64_prof_i_trial.dll`
- Description: `LCPI OLE DB Provider for InterBase [v5] [Prof]`
- Version: `Prov - 5.29.0.42296 OLEDB - 02.60`
- Source: DBMS: `Firebird 2.5.9.27139`
- Data Source: `E:\DATABASE\IBP_TEST_FB02-5-9_D3.G Up`
