Python3.9

```
import tkinter as tk
```

```
root = tk.Tk()
```

```
frame=tk.Frame(root, borderwidth=2, relief="sunken")  
root.title(«Frame Example»)
```

```
image = tk.Image(frame, file='Roza_1.png')  
image.pack(pady=5)  
root.mainloop()
```

```
from tkinter import PhotoImage, Label, Tk
```

```
root = Tk()
```

```
img = PhotoImage(file="Roza.png")
```

```
label = Label(root, image=img)
```

```
label.pack()
```

```
root.mainloop()
```
